Business Productivity
Digital transformation allows UCI to solve business problems more quickly, and create solutions in a more innovative way. Moving to Office 365 Suite provides higher levels of productivity, increased collaboration, and ensures a higher level of productivity, efficiency and work speed.

NOTE: For the purposes of this understanding, UCI will assume office and printer space at no cost for service users.

Microsoft Office 365 Suite
A collection of web-based tools that support the business needs of research, education and community service.

ServiceNow
Digital work platform that helps increase productivity and reduce overall business costs, productivity, cost, and speed.

DocuSign
Secure e-signature platform.

FileNet
Secure document management repository.

Information Security Tools
In formation security tools allow us to protect important assets and connect securely with ease. OIT is working to create a more innovative and resilient information technology environment. OIT’s efforts to integrate platforms has allowed for them to talk seamlessly to each other.

DocuSign for electronic routing and signing process, made possible through the use of Digital document transmission, encryption and storage at UCI is a multi-pronged solution. OIT’s project management services cover seamlessly to each other.

The Office of Information Technology is focused on solutions that make our operations more efficient and secure.

Information security tools allow us to protect from vulnerabilities on an individual level.

NOTE: To request more information or begin the onboarding process for an OIT provided service or product, please contact oit@uci.edu

Business Productivity
As a strong strategic partner to campus, the Office of Information Technology provides information technology leadership, services, and innovative solutions to promote the research, education and community service goals of the University.

Research Support
The Office of Information Technology is focused on solutions that help faculty, students, and staff, and facilitate the University’s mission of teaching, research, and service through technology. UCI’s research efforts contribute to finding solutions to today’s challenges.

Campus Research Storage Pool (CRSP)
Offer cost-effective and high-performance storage of large research data sets.

UCSD Scarab
Provides managed services to meet secure hardware and data management needs for research data storage.

UCI Secure Research Environment (SRE)
Provides a secure, campus virtual server environment.

Veeam / Networker
Daily and offsite backup and recovery service performs full exams and a variety of response modes to ensure data back up.

Data Center Co-Location
Value added colocation services at campus. Offering levels of UCI level, depending on needs.

Office to Office
High speed, low latency connectivity.

Campus Research Storage Pool (CRSP)
Offers cost-effective and high-performance storage of large research data sets.

UCSD Scarab
Provides managed services to meet secure hardware and data management needs for research data storage.

UCI Secure Research Environment (SRE)
Provides a secure, campus virtual server environment.

Veeam / Networker
Daily and offsite backup and recovery service performs full exams and a variety of response modes to ensure data back up.
